

Uncharted | 2027

Powered by love.

Go faster, go further. The Uncharted delivers up to 338 horsepower, up to 308 miles of range,[1] and fast charging from 10% to 80% in about 28 minutes.[2] Available Symmetrical All-Wheel Drive brings legendary Subaru capability to all-electric performance. With three trims to choose from, find your perfect balance of power, versatility, and range. The decision is yours. So is the road.

Uncharted GT with Gray StarTex®.

Information current at time of printing.

1 Manufacturer-estimated range on a full battery charge. Applies to Premium FWD trim only. Actual range will vary by trim and with driving conditions, weather, and your vehicle's condition. 2 Charge time varies based on vehicle level of charge, charging rate, ambient temperature, and many other factors. 3 EyeSight Driver Assist Technologies may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving. Pre-Collision System is designed to provide automatic braking that either prevents a collision or reduces the severity of a frontal impact. Acceleration Suppression at Low-Speed is designed to reduce acceleration and minimize the severity of certain frontal impacts. Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving. Lane Tracing Assist operates only when used in conjunction with Dynamic Radar Cruise Control. Lane Departure Alert and Lane Departure Prevention operate only when the lane markings are visible. System effectiveness depends on many factors, such as vehicle maintenance, weather, and road conditions. See your Owner's Manual for complete details on system operation and limitations 4 Traffic Jam Assist is not an automated driving system and is not a substitute for safe and attentive driving. The driver is always responsible for safe vehicle operation. Do not overly rely on this system and pay careful attention to surrounding conditions. See Owner's Manual for complete details on system operation and limitations. Traffic Jam Assist requires an active trial or subscription to Drive Connect. 4G network dependent. 5 The distraction mitigation system is a driver recognition technology designed to alert the driver if their attention to the road wavers or if the driver's face appears to turn away. The driver is always responsible for safe and attentive driving. System effectiveness may be affected by articles of clothing worn on the head or face. See Owner's Manual for complete details on system operations and limitations. 6 Premium paint at additional cost. See your Subaru retailer for details.
